Dear 

RE: Basic Education Quality Improvement Programme (BEQUIP)

The Kenya National Commission for UNESCO appreciates the involvement of the Commission in Basic Education Quality Improvement (BEQUIP) Programme in Kenya. Notably, BEQUIP complements the ongoing capacity building of teachers on Competence Based Curriculum (CBC) and particularly on strengthening the capacity of teachers to deliver activity oriented and experiential learning towards enhanced learning outcomes.

Over the period of our participation in BEQUIP activities, it is apparent that the Edukans' Active Teaching and Learning model is impacting positively on teacher pedagogical skills. This is valuable contribution towards education quality in Kenya and ultimately to the realization of Sustainable Development. We view it a worthwhile course to scale-up the programme to many more schools and other training institutions for betterment of teaching and learning.

It is noted with much appreciation that the implementing team of the programme has keenly taken into account the technical feedback provided by the commission. In particular, the commission was keen on the strengthening of teacher-learner interactions and the improvement was evident in the presentations made by the teachers towards the end of the second phase. We consider this a significant aspect of our collaboration and we look forward to working with you in the next phase of the programme.

Yours 

Dr. Evangeline Njoka, MBS
SECRETARY GENERAL/CEO
